BODLEIAN
21 DEC 1964

ALL measures of longitude are deduced from barley-corns; three barley corns make an inch, twelve inches one foot, three foot one yard, five yards and a half one Nature-pole, or pearch; forty pearches make a furlong, eight furlongs make one Englisſh mile; in a mile are three hundred and twenty pearches, or poles. One thouſand fifty six paces; Ells, one thouſand five hundred and eight; Yards, one thouſand seven hundred and ſixty; Feet, five thouſand two hundred and eighty; inches, ſixty three thouſand three hundred and ſixty; and Barley corns, one hundred ninety thouſand and eighty.

The Circumference of the Earth and Sea joyntly is 25036 miles, and the Diameter 7966 miles, and its Sea diameter 3983 miles, according to Engliſh meaſuration.

The Dimenſions of *England* and the adjacent Iſlands.

THe length of England from South to North is 320 miles, the braodeſt place from the lands end to Sandwich is 275 miles, the next broadeſt place, which is between St. Davids and Yarmouth in the Eaſt, is 240 miles, the whole compaſs of England is 1532 miles.

The length of Ireland North and South is 303 miles, the greateſt breadth thereof Eaſt & Weſt is 123 miles, the whole compaſs of the main Land is 948 miles.

The greateſt length of Scotland South and North is 480 miles, and the breadth Eaſt and Weſt is 165 miles, the whole compaſs 1100 miles.

The Iſle of Man is in length 28 miles, the breadth 10 miles, and in compaſs 91 miles.

The Iſle of Angleſey is in length 21 miles, in breadth 18 miles, in compaſs 85 miles.

The Iſle of Wight is in length 22 miles, in breadth 12 miles, in compaſs 57 miles.

The Iſle of Garnſey is in length 13 miles, in breadth 6 miles, the whole circumference is 36 miles.

The Iſle of Ierſey, in length 10 miles, in breadth 5 miles, the compaſs 28 miles.

A Geographical Description of the World, containing Europe, Asia, Africa, and America.

EUrope conteins in it these Provinces, Germany, Swedeland, Denmark, Italy, Muscovia, Hungaria, France, Polonia, Sclavonia, Norway, Grecia. The most eminent Islands are these, Great Brittain, Ireland, Sardinia, Candia, Sicilia, Nigropont, and Corsica.

The greatest length of this part of the World is 3000. miles, the breadth, 900.

Asia, the biggest of the four, and first known part of the World, conteins these principal Regions and Islands, viz. Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India Parthia, Medea, Palestine, Chaldea, Tartaria.

In Africa are these Provinces, viz. Egypt, Barbary, Ethiopia, Nubia, Abassines, Alonomotopa, Lybia. The Islands, Magdagerde, S. Thomas, Insula de Cape Verde, Insula de Canaria, Insula de Madera.

America, the fourth part of the World, and of the latest discovery, consisteth of these two parts, Mexicana and Peruana.

The Provinces of Mexicana are Nova, Hispania, Terra Florida, Nova Alboina, California, Noimbegæ, Nova Francia, Estoriland. The chief Islands of Mexicana are Greeniand, Heland, and Friesland.

The Provinces of Peruana are Brasil, Pisni de Caibana, Peru de Cartanen, Chila, Charon, Chica, Patagoros. The chief Islands of Peruana are Hispaniola, Cuba, Jamaica, and many others.

	70	0 7 0	1 1 0	2 2 0	3 3 0	4 4 0
	80	0 8 0	1 4 0	2 8 0	3 12 0	4 16 0
	90	0 9 0	1 9 0	2 14 0	4 1 0	5 8 0
	100	0 10 0	1 10 0	3 00 0	4 10 0	6 0 0

The use of this Table is this; if thou wouldst know what the Interest of 100 and 5 pounds is, for 9 Months, at 6 per Cent. then in the first Column find out 100 at the foot of the Column, and right against it under the title 9 Mon. (which is the fifth Column) there you shall find 4 l. 10 s. and against the number 5 l. you shall find 4 s. 6 d. so that the Interest of 105 l. for 9 Mon. cometh to 4l. 14 s. 6 d. the same of all the rest.

This is the Seaſon for good Husbands to lop and prune ſuperfluous Branches from Fruit-trees; Uncover their Roots, ſet all kinde of Quickſets and Fruit-trees in the New of the Moon. Be ſure the Wind be not North nor Eaſt; and ſet the ſame ſides to the South and Weſt, which grew at the firſt. Set Beans, Peaſe, and Parſnips: The weather mild and Moon decreaſing, dig Gardens; drench weak and ſick Cattle, Kine, with Verjuice, Horſes with water and ground Malt, ſodden with a little Bran.

In this Month let not Blood, nor uſe Phyſick, unleſs neceſſity conſtrain thee; beware of taking cold, for Rhumes and Flegme do much increaſe this Moneth: Its hurtful to faſt long, to drink Whitewine faſting is good; uſe Meats that are moderately hot, for the beſt Phyſick is warm diet, warm cloaths, good fires, and a merry honeſt Wife.

Februarv hath xxviii dayes.

This moneth ſet, cut, and lay Quickſets and Roſes, as all other Plants. Set and plant Vines, Hops, and all fruit that grows on Buſhes. Sow Peaſe, Beans, and Onions; furniſh your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Canker, & ſuperfluous Branches. Remove Grafts or young Trees, in the laſt quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge, you may let Blood, but be ſparing in Phyſick, and be ſure when a warm day comes, to prevent taking of cold, through careleſneſs; for the warm air this moneth is not laſting, but oft deceives us to our prejudice.

In this moneth flimy fiſh, milk, and the like, that do opilate, and ſtop the Liver and the Veins, and thicken the blood, are to be eſchewed as enemies to health.

This Moneth commands the provident Housewife, and the prudent Artist, to set their Stills on work. In the beginning of the moneth sow and set those tender Summer Herbs that would not endure the former cold. Weed your Hop-Gardens, cut off superfluous Branches, Moss Trees and Gardens, and weed Corn; rise early, and walk the fields and gardens.

Now every Garden and Hedg affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and Sweet-butter, an excellent breakfast. Clarified Whay with Sage, Sowry-Grass Ale and Wormwood Beer, are wholesome Drinks. Green Whay excellent against Choler: eat and drink betimes in the morning, abstain from meats that are hot in nature, and salt in quality.

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whol year. Set Roſemary and Gill-flowers, ſow Lettice and Radiſh three or four days after the Full and they will not run to Seed Shear your Sheep the Moon increaſing. Take heed of cutting herbs or flowers with knife, but rather gather them with your fingers.

Let honeſt moderate Labor and Exerciſe procure your Sweat. Thin and light Diet, and chaſte Thoughts, tend to health Lie not unadviſedly on the Ground, or overhaſtily drink Diſtilling of Roſes, and making of Surrups and Conſerves are now in prime: uſe a light and thin diet, for the ſtomach is weaker now then in the former moneths: clarified Whey boiled with cold herbs very holſome.

July hath xxxi dayes.

Get Rue, Wormwood, and Gall, to ſtrew on your Flores to deſtroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the ſhade, than in the Sun, which too much exhaleth their vertue, but to avoid corruption, let the Suns heat a little viſit them.

Beware of violent heat, and ſudden cold, which are the great diſtempers of this moneth, and produce peſtilential diſeaſes: Forbear ſuperfluous drinking but eat heartily: Uſe cold herbs and meats, abſtain from phyſick. Now the rivers are more wholſome then the baths. In time of Peſtilence keep your chamber-windows ſhut till the Sun have force of ſhining: perfume your chamber every morning with tarre upon a Chafingdiſh of coles: Uſe *Cardaus Benedictus* boyled and drank faſting.

Now with thankfulneſs reap your deſired Harveſt. Sow Winter Herbs in the New of the Moon. Eſteem fair weather as precious, and miſpend it not. Gather Garden Seeds near the Full. Uſe moderate diet, forbear to ſleep preſently after meat. Take heed of ſudden cold after heat.

Beware of Phyſick and Blood-letting in the Dog-days, if the Air be hot; otherwiſe, if occaſion require, you may ſafely make uſe thereof. Now moderate Dyet is beſt, beware of ſurfeits, heats and colds, for pluriſies are ingendred thereby. Uſe not to ſleep much, eſpecially in the afternoon, for that brings Opilations. Headach, Agues, and Cathars and all noxious diſtempers o the ſame kind. Red Wine and Claret are excellent Remedies for Children againſt the Worms

The beginning of this Month, and the end of the former, gather Hops, their complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and set all slips of Flowers, between the two Lady days; remove Trees from *September* till *February*, especially in the new of the Moon: The weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit. Sow Wheat and Rie, Winter Parsnips and Carrots; and set Roses, Strawberries and Barberries.

Now as the year declines, provide your Winter Garments, hang them on loosly, to prevent that you might after repent of: Good for Physick and Phlebotomy.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon, obſerving this as a ſeaſonable Secret, that in ſetting, you carefully place that ſide to the South and Weſt, which were ſo before you took up the plant; otherwiſe the cold kills it. Gather your remaining Winter fruit, ſet all kindes of Nuts and Acorns, and cut Roſe-trees but once in two years, if you intend to have ſtore of Roſes.

The Garments you laſt month hung on your backs in jeſt, now Button them cloſe in good earneſt; Cloath you now for prevention, for the Cold comes inſenſibly, and Fogs oftimes beget a whole Winters cold. Conſult with your Tailors, as well as Phyſicians.

Set Crabtree ſtocks to graft on. In the old of the Moon, ſet Peaſe and Beans, and ſow Parſnips and Carrots. Trench Gardens with Dung, uncover the Roots of your Apple-trees. and ſo let them remain till *March*. Kill Swine in or near the Full of the Moon, and the fleſh will the better prove in boiling.

The beſt Phyſick this moneth, is good exerciſe, warmth, and wholſome meat and drink: but if any diſtemper afflict the body, finiſh your phyſick this moneth, and ſo reſt till *March*, unleſs neceſſity urge. Uſe good meat and wholſome drinks to nouriſh the blood. Be ſure to go dry of your feet; for if you go wet of your feet (unleſs it be thoſe always uſe to it) be certain to be troubled with Rheum & cold, and other inconveniencies attending.

In the laſt quarter of the Moon this moneth and the next, are the beſt times to fell Timber: Let Fowlers minde their Game. Cover all your beſt Flowers and Herbs from cold and ſtorms, with rotten Horſ-dung: Look well to thy Cattle, Blood Horſes. Let a warm fire, and a cup of *Nectar* be thy Bath; the Kitchin thy Apothecaries ſhop, Hot meats and broths thy Phyſick, and a well ſpred Table the proof of thy Charity to thy poor Neighbors, to whom this advice is ſeaſonable;

If thou be poor, and canſt not feaſt at all,
Thank God for ſuch as thee to feaſting call.

The beſt Phyſick is as before, a merry honeſt heart, and the exerciſe of Charity among the poor Neighbors.

Of Eclipses this present Year 1670.

THere will be four Eclipses this year, two of the Sun, and as many of the Moon.

The first is a partil Eclipse of the Moon upon the 26th of *March*, about Eleven a Clock in the Forenoon, and will be seen to our *Antipodes*.

The second is a partile Eclipse of the Sun upon 9th of *April*, about the time of his setting, and be only visible to the *North-West* part of the world, *Nova Francia*, *Scotiland*. &c.

The third is a partil Eclipse of the moon, upon Sunday night the 18th of *September*, and will be visible in *England*, the beginning will be at a quarter past on Munday morning, the tone oppositon at 31. after 2. the middle at 3 quarters after two, the end at four and almost a quarter, the total Duration is two hours 53 minutes: parts or dig. eclipsed, are 9 and a

The 4th & last is of the Sun on the 3d day of *October* a little before midnight, & will be a very small Eclipse and will be visible only in the remote Southern parts to us, as in *Magellanica*.

The Description of the Four Quarters of the Year.

THe Spring begins this Year *March* 21. a little after 5 in the Morning, the Sun then entring the first Scruple of *Aries*, making equal day and night.

The Sun enters the *Northern* Solstice Cancer the 11 of *June*, bout 3 quarters past 7 in the morning, causing to us longest Day, and shortest night.

The Sun Cuts the Æquator in Libra *Sept.* 13. eleven at night, equallizing again day and night.

Winter Quarter takes begining 11th of *December*, 3 quarers after 10 in the morning, the Sun entring the Southern Solstice Capricorne, causing with us the shortest day, & longest night in the

Side Table, whereby is found the time of the full Sea, at the chiefest Ports in and adjoyning to this Kingdom.

The use of this Table, with a Caution.

Do but observe in the fifth Column of the Almanack the hours and minutes of full-Sea at London-Bridge over against each several day of the Moneth, and from which time there noted, add or subtract the hours and minutes as this Table above doth direct, and the total of the one, or remainder of the other shall be the time of the full-Sea at any of these Ports aforesaid, salved the Antisipation or prorogation of time, which by the winds, Land floods, or Moons latitude may be caused, which may be sometimes, or sometimes more or less errors, according the force and quantity; a thing very remarkable of those seen when they pass by any Sands, even any low Shoves, or such like.

A true and plain Description of the
wayes in *England* and *Wales*.

From **London** to **Cambridge** 44 miles,
thus accounted:

FRom London to Waltham 12 miles, thence
Ware 8 miles, thence to Puckridge 5 miles, t
to barkway 7 miles, thence to Fulmise 6 miles
to Cambridge 6 miles.

From **London** to **Oxford** 47 miles, thus:
From London to Uxbridge 15 miles, thence
consfield 7 miles, thence to Wickam 5 miles, t
to Stoken church 5 mil. thence to Tetsworth
thence to Wheatly-bridge 5 mil. then to Ox
From **Coventry** to **Oxford** 44 mil. thus
From Coventry to Southam 14 mil. thence to
bury 10 mil. thence to Woodstock 14 mil. then
Oxford 6 miles.

From **Oxford** to **Cambridge** 52 mil. thus
From Oxford to Bisciter 10 mil. thence to
ingham 9 mil. thence to Newport 8 mil. then
Bedford 7 mil. thence to Gamlinghay 9 mil. th
to Cambridge 9 miles.

From **Coventry** to **Cambridge** 48 mil. thus
From Coventry to Dunchurch 8 mil. thence to
hampton 10 mil. thence to Higham-ferries 10
then to S. Edes 8 mil. then to Cambridge 12 mi

From **Bristol** to **Oxford** 48 miles, thus
From Bristol to Sudbury 10 mil. thence to
gloucester 12 mil. thence to Farrington 14 mil. th
to Oxford 12 miles.

From **York** to **Barwick** 108 miles, thus
From York to Tadcaster 17 miles, thence to N
allerton 7 miles, thence to Darrinton 10 mil.
to Durham 14 mil. thence to Newcastle 11 mil.
to Morpit 14 mil. thence to Anwick 14 mil.
to Belford 12 miles, thence to Barwick 12 miles.

From **London** to **York** 151 mil. thus:
From London to Waltham 12 mil. thence to W
8 mil. thence to Royston 14 mil. thence to Hun
don 15 mil. thence to Stilton 9 mil. thence to
ford 12 mil. thence to Grantham 16 mil. th

...ck 10 mil. thence to Tunford 10 mil. thence to ...caster 18 mil. thence to Wembridge 7 mil. hen ...caster 12 miles, thence to York 8 miles.

From **Cambridge** to **York** 114 miles thus:
From Cambridge to Huttington 12 miles, to ...rk 102 miles.

From **Oxford** to **York** 118 miles, thus:
From Oxford ...Banbury 17 mil. thence to Wee... 10 mil. thence to Welford 14 mil. thence to ...caster 12 mil. thence to Monford 5 mil. thence to ...ttingham 11 miles, thence to Mansfield 12 miles, ...nce to Doncaste: 20 mil. thence to York 27 miles.

From **Shrewsbury** to **York** 103 miles, thus:
From Shrewsbury to Prine 12 mil. thence to Whit...ch 4 mil. thence to Beeston-wood 12 mil. thence ...Northwich 9 mil. thence to Manchester 16 miles, ...nce to Rochdale 8 mil. thence to Blackstone edge ...miles, thence to Hallifax 6 mil. thence to Bradford ...miles, thence to Otely 6 miles, thence to Wethe by ...mil. thence to York 7 miles.

From **Nottingham** to **York** 59 miles, thus:
From Nottingham to Mansfield 12 mil. thence to ...caster 20 mil hence to York 27 miles.

From **London** to **Norwich** 95 miles, thus:
From London to Barkway 31 mil. thence to Whit...bridge 10 mil thence to Newmarket 12 mil. then ...ck ingham sands 16 mil. hence to Therf...d 5 mil. ...nce to Attleborough 10 mil. thence to Windham ...miles thence to Norwich 5 miles.

From **London** to **Buckingham** 86 miles, thus:
